

Congratulations on choosing **myaib** for your property, a home improvement designed to clearly identify your home to all delivery and emergency services. Please read the following instructions clearly before use.

### Whats in the box....

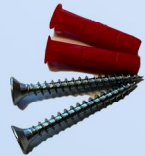

Your **myaib** unit

Low Voltage  
Power Supply

Fixing kit for securely  
affixing your **myaib**

Download the **myaib** app using the QR Codes below  
or search the play or app store for **myaib**

# Instructions for use

## Manual Mode

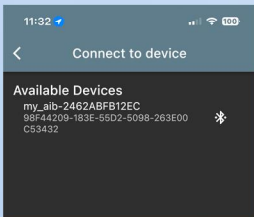

Once connected to the power supply the unit can be operated using the switch located on the base of the unit (indicated below). Simply pressing this button cycles the unit through the different states :  
Normal White illumination - Delivery - Emergency - off.  
If the button is not pressed for 10 seconds the next press will switch the current light state off.

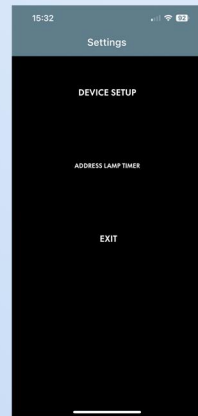

## App based remote control mode

Before powering the unit on, simply download the **myaib** app from your chosen provider using the QR codes in this manual.

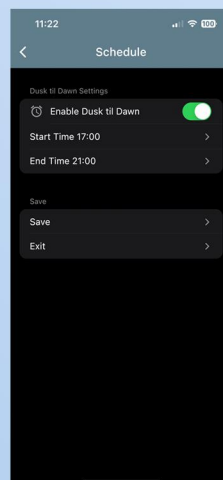

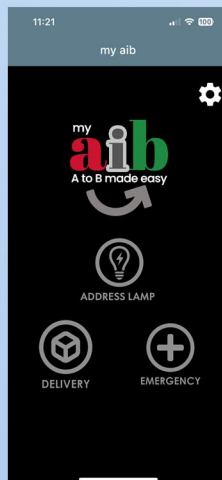

Once installed ensure your smart device has its Bluetooth enabled and is connected to your WiFi network. Open the **myaib** app and power on the unit. Select the settings cog to access the main menu.

Press 'Device Setup' and then Select your **myaib** from the list of available devices and input your WiFi password to connect your unit to your home WiFi network

Once connected you will be able to control your **myaib** using the App. Pressing the 'Delivery' or 'Emergency' buttons on the app will change your **myaib** illumination from white to either Red or Green to highlight your address clearly to either delivery or emergency services. Delivery and emergency lighting will automatically extinguish and return to normal white lighting after 1 hour after activation.

Try enabling the 'Dusk till Dawn' setting allowing you to control when your **myaib** will illuminate with a crisp white light
